

Ocu+™ - Sodium Hyaluronate Solutions (1% / 1.4% / 2%)

Ocu+™ is a clear cohesive ophthalmic viscosurgical device (OVD) comprised of an ultra-purified, high molecular weight sodium hyaluronate for use during anterior segment surgery, primarily cataract extraction and IOL implantation. Ocu+™ provides and maintains space during capsulorhexis, phacoemulsification and IOL implantation. The OVD can be easily removed at the conclusion of the procedure. The enhanced rheological properties of Ocu+™ and its high degree of biocompatibility allow the ophthalmic surgeon to complete all the phases of phacoemulsification cataract surgery with confidence

CONCENTRATION	1.0%
DOSAGE	1.0ml
CANNULA SIZE	25 Gauge
BEHAVIOUR	Cohesive
VISCOSITY	10,000-30,000 Cp
MOLECULAR WEIGHT	700,00 to 1.6 x 10 ⁶ Daltons
PACKAGE	Luer-lok glass syringe & medical grade pouch
PACK SIZE	Box of 10
STORAGE	Store at 2-8° C

Ocu+™ Viscoelastic Solutions

Technical Specification

CONCENTRATION	1.4%
DOSAGE	1.0ml
CANNULA SIZE	25 Gauge
BEHAVIOUR	Cohesive
VISCOSITY	30,000 – 50,000 cP
MOLECULAR WEIGHT	2.8×10^6 - 3.4×10^6 Daltons
PACKAGE	Luer-lok glass syringe & medical grade pouch
PACK SIZE	Box of 10
STORAGE	Store at 2-8° C

CONCENTRATION	2.0%
DOSAGE	1.0ml
CANNULA SIZE	25 Gauge
BEHAVIOUR	Cohesive
VISCOSITY	40,000 – 85,000 cP
MOLECULAR WEIGHT	2.8×10^6 - 3.4×10^6 Daltons
PACKAGE	Luer-lok glass syringe & medical grade pouch
PACK SIZE	Box of 10
STORAGE	Store at 2-8° C
